Delegation At Council Meeting

Combined Library And Civic Centre Suggested

A large delegation representing the Vulcan County Arts Council, the Lions Club and the Elks Lodge, interviewed the town council Monday evening, asking that the recreational grant available to the Town of Vulcan under the provincial government's five-year plan be used as the nucleus of a fund for construction of a civic centre type of building in Vulcan.

The initial proposal is for a building that would house the library and, as well, have a hall, stage and kitchen facilities that would be available for banquets, plays and similar functions. It was suggested that the present library might be expanded into a regional library to serve a large area around Vulcan.

A meeting of representatives of all town and district organizations will be held in the near future, with provincial government officials in attendance to fully explain the regional library plan and give details as to costs, available government grants, etc. Date and place of the meeting will be announced as soon as possible.

Here's a way to capture the refreshing flavor of those delicious strawberries for all-year-round enjoyment. It's a quick, sure recipe for Strawberry Preserves which tastes as tempting as it looks.

STRAWBERRY PRESERVES
6 cups small whole berries (about 3 lbs., firm ripe small strawberries)
1/2 cup water
7 cups (3 lbs.) sugar
1/2 bottle Certo fruit pectin

Prepare the strawberries. Hull about 2 quarts small strawberries. Measure 6 cups whole berries (firmly packed without crushing) into a very large saucepan. Add water and sugar.

Now, make your preserves. Place over high heat and bring to a full rolling boil, stirring carefully to keep fruit whole. Reduce heat and boil gently 3 minutes. Remove from heat and at once stir in Certo. Skim off foam with metal spoon. Then let cool about 1 hour, to help prevent floating fruit. Ladle into glasses. Cover preserves at once with 1/2 inch hot paraffin. Makes about 10 medium glasses.

Know what pectin is? It's the jelling substance found in all fruits in varying amounts. Certo is pectin extracted from fruits rich in this natural substance, then refined and concentrated. When you follow the tested Certo recipes, your jams and jellies always set just right.

Any problems with jam and jelly making? We'll be glad to help. Just drop us a line, General Foods Kitchens, 44 Eglinton Ave. W., Toronto.

P.S. Be sure to watch for the special, beautifully colored *Preserving Kettle* insert in this paper next week. It contains ten recipes for delicious jams and jellies!

We hope you enjoy
this letter
as much as we do.
It was written
by one of our
11 year old customers,
a student at
Unionville
Public School.

Unionville Ont.
March 23, 1960.

Dear Sir,
I am not saying
you do not take good care
of the money in your bank
but please take very good
care of mine. Now I don't
know just how you keep
the money whether you
put it all in one place
together or in separate cells
with locks or what. But,
I am saving up for a horse
and as I think you know,
a horse and a place to
keep it, plus the feeding is
very expensive and a horse
is hard to support.

Thank you for taking
time to read this and please
help me get my horse in
that way.
Yours Respectfully
Barbara Louise
Lunney

YES, Barbara... The BNS knows how expensive a horse can be. So—don't worry about your money... we'll take good care of it until you are able to buy your horse.

Lost Weight, Looks 10 Years Younger

COBALT, ONT. "Seven weeks ago I started the Naran Plan and have lost an average of 4 lbs. a week since. I have lost 28 lbs. and it has not left me weakened or nervous. I can now work all day and still feel good. My friends say I look ten years younger and I feel that way too. I have taken off 6 inches around the waist."

I have recommended the Naran Plan to my friends and anyone who has had to give up on other reducing plans. With the Naran Plan you take the weight off where you want it to come off." F. A. Desjardins, Cobalt, Ont.

Don't let excessive weight tire you out, make you feel run down and older than you are. Your entire outlook on life will improve if you lose excess weight, you will look younger, feel younger and regain the enthusiasm that comes with good health. Why let anything as vitally important as your health and appearance be hurt by neglecting to lose excess weight. Try the Naran Plan today, it is sold on a money back guarantee. What can you lose? Nothing but weight.

SERVICE BOARD NOTES

Norman Soder

Heavy infestations of grasshoppers are apparent in many parts of the County. Farmers, who are aware of the damage that can be caused by the grasshoppers, are applying poison spray to the infested areas. Farmers are warned to keep checking for the small grasshopper and to keep in mind that early control is the more effective and the cheaper.

Dieldrin is available at the County office for the control of grasshoppers. A gallon of Dieldrin, applied with 4-5 gallons of water per acre, is sufficient to spray 32 acres when the grasshoppers are young. As the grasshoppers get older the insecticide should be applied at heavier rates.

Crop conditions are good except for some wireworm damage. Some of the earlier crops are quite weedy and again, with early crop control less chemical is needed, resulting in lower costs.

Proper calibration of sprayers is very important in applying insecticides and herbicides. Most insecticides and herbicides should be applied with 4-5 gallons of water per acre. Once the sprayer's pressure and speed are regulated to apply the proper amount of water, it is a simple matter to apply the amount of chemical required to do an effective job.

The name of the Quebec mining town of Val d'Or means "valley of gold", although the town is built on a high plateau; the name is thought to have come from a brand of tobacco popular with early miners in the region.

DEFENCE

"It is not the critic who counts; not the man who points out how the strong man stumbled, or where the doer of deeds could have done better. The critic belongs to the man who is actually in the arena, whose face is marked by dust and sweat and blood; who strives valiantly; who errs and comes short again and again; who knows the great enthusiasms, the great devotions; who spends himself in a worthy cause; who, at the best, knows in the end the triumph of high achievement, and who, at worst, if he fails at least fails while daring greatly, so that his place shall never be with those timid souls who know neither victory nor defeat."

THE SECOND LINE OF DEFENCE

The tremendous strides that have been made by scientists in the development of suitable chemicals have revolutionized weed control and have done much to aid in the battle against weeds.

It would be a mistake, however, to rely upon chemicals alone. Tried and tested cultural methods, the use of clean seed and the prevention of the spread of weeds will continue to be important as the farmers' second line of defence. These constitute good farming practice for which there can be no substitute.

C.G.I.T. Group
The Champion CGIT Group recently held their annual Mother and Daughter Banquet in the United Church basement. The

basement was artistically decorated in an African theme in keeping with their African mission study. Charts of the different phases of life of an African boy and a Canadian boy in Africa decorated the walls. The tables were centered around an African thatched hut and miniature African totems served as place cards.

Each girl presented her mother with a lovely carnation. A delicious supper was served by the WA after which Mrs. Shields of Vulcan, guest speaker, spoke to the girls about the different phases of CGIT.

An affiliation service followed supper. Then everyone went upstairs to watch a film about African girls in training. The girls sang "Taps" to close a very enjoyable evening.

PROUDLY WESTERN

A Salute to the West's English Immigrants

Barr Colonists on the North Saskatchewan River above Lloydminster - 1904

Of all heroic stories written into Western history, that of the Barr colonists dramatically demonstrates the courage characteristic of English-born pioneers.

Recruited from London's working classes by a clergyman, Rev. I. M. Barr, who has been called variously an "idealist" and a "knave", the 2,300 Barr colonists jamming a converted Boer war troop ship to twice its normal capacity, sailed from England on March 31, 1903. They were bound for "the promised land"—the fertile plains west of the fourth meridian, south of the North Saskatchewan river.

At Saskatoon hardship began to pile on hardship. Deserted by Barr, victimized by merchant suppliers, demoralized by their loss of possessions, disheartened by the savagery of the Canadian climate, they nonetheless made the agonizingly-slow journey by wagon across the prairie from Saskatoon. There a heart-breaking winter followed, for the colonists were woefully handicapped by their lack of agricultural knowledge.

Yet they stayed. The following year other Barr colonists joined them, some landing by rail at Strathcona to come down-river in make-shift barges and scows, a ten-day journey during which men, women and children huddled together under no covering but a sky lashing cold spring rain.

And time has proved it was indeed a promised land they found!

welcome. A light shower on Saturday measured .15, not enough to do much good. The country is now at its greenest best and grain fields look good. Gardens are also reported to be coming along well so if the weather man comes through with some raindrops in the near future all will be well. The head of the house reported seeing some antelope on the hills to the east and if ducking/hatches are an indication of duck population for fall, the hunting should be good as hatches seem to be larger this year than for some time.
